Topic	Summary of Discussion/Decision
Merging food feature and chat feature to the main branch	Since we completed the food feature and chat feature on separate branches we met and checked over our features before merging them to the main branch to finalize MVP 1 requirements. Main branch now includes both features integrated.
Discussion on Events Page and Dashboard functionality completion timeline	Discussed possible start times for starting and completing each feature. We decided to work on Dashboard after Final exams, and the Events page can be at least started if not completed before we begin exams. Dhruv and Dinesh agreed to take lead on each feature, with help from both Favor and Abraham along the way. Created branches on github outside of main branch to work on each feature
Mentor meeting	Plan to get in touch with our mentor to set up a meeting to demo our prototype and get some feedback on progress as of yet. Dhruv volunteered to email him.
Final Scrum planning	Plan to meet up the following weekend to prepare for scrum on 29th. Dhruv will upload powerpoint and everyone will decide on which topics we will present. Communicate through the chat.
