

MEETING MINUTES	
<b>Project Name</b>	URXperience
<b>Meeting Name</b>	Project idea discussions
<b>Meeting Facilitator</b>	All members
<b>Meeting Details</b>	September 14, 2022
<b>Meeting Invitees</b>	Favor, Dinesh, Dhruv, Abraham
<b>Minutes:</b>	
Topic	Summary of Discussion/Decision
What Kind of application do we want	We decided on making a community app for UofR residence and Resident assistant
Northstar customers	Application should cater to UofR residence and be manageable by RA's to update important resident notices
Features for the application	After deliberation we decided the top three features to implement into our application were: Communities(Groups/Faculties), Events(controlled by RA, via posts), & Food(Recipe of the day, takeout locations)
Platform	Mobile or web? start web and if time permits, move to mobile. options: progressive web app( <a href="#">Progressive Web Apps in 100 Seconds</a> // <a href="#">Build a PWA from Scratch</a> )
Vlog 1 work distribution	Create google doc, listing key topics and members can put their name beside topic of choice.
